

GENGIGEL®

Hyaluronic Acid

Baby

Relief for Pain and Swelling

PRODUCT OVERVIEW

Oral gel that reduces pain and swelling during the gum inflammation typical of infancy and promotes healing.¹

- Mechanically isolates damaged mucosa, relieves pain and supports natural tissue repair.
- Promotes water absorption, reducing edema and soothing the inflammatory process².

ADVANCED TECHNOLOGY

- **High-Molecular-Weight Hyaluronic Acid**
Deep hydration and physiological regeneration support.
- **Patented HA + GFC Synergy³**
Enhanced mucoadhesion and prolonged film persistence.
- **PVM/MA Copolymer⁴**
Strong anchoring and resistance to salivary wash-out.

MECHANISM OF ACTION

- Forms a strong and elastic film
- Mechanically isolates the lesion
- Reduces pain and swelling, and promotes healing.

PLUS

- Strong mucosal adhesion
- Long-lasting protective barrier
- Alcohol- and sugar-free. Does not contain artificial flavourings, gluten, lactose, parabens, SLS or GMOs.
- Patented
- Clinically tested for infants.
- Very high safety profile
- Medical Device class II a

INDICATIONS

- Teething
- Oral mucosa traumas

CONTENTS

- Tube 20 ml
