

GENGIGEL®

Hyaluronic Acid

FIRST AID

Relief for Acute Oral Lesions

PRODUCT OVERVIEW

First Aid management of **acute lesions of the Oral Mucosa**.

- Mechanically isolates damaged mucosa, relieves pain and supports natural tissue repair.
- Promotes water absorption, reducing edema and soothing the inflammatory process¹.

ADVANCED TECHNOLOGY

- **High-Molecular-Weight Hyaluronic Acid**
Deep hydration and physiological regeneration support.
- **Patented HA + GFC Synergy²**
Enhanced mucoadhesion and prolonged film persistence.
- **PVM/MA Copolymer³**
Strong anchoring and resistance to salivary wash-out.

MECHANISM OF ACTION

- Forms a mucoadhesive film
- Mechanically isolates the lesion
- Reduces contact pain

PLUS

- Shear-thinning application
- Strong mucosal adhesion
- Long-lasting protective barrier
- Alcohol- and sugar-free
- Patented
- Medical Device class II b

INDICATIONS

- Acute phase of mucosal injuries
- Post traumatic wounds
- Painful extensive lesions⁴

CONTENTS

- Bottle 50 ml
