

GENGIGEL®

Hyaluronic Acid

TEEN

Healthy Growing Mouths

PRODUCT OVERVIEW

Oral gel specifically developed for adolescents to restore healthy gums and soothe inflamed oral tissues¹.

- Its dedicated formulation architecture mechanically isolates damaged mucosa, relieves the symptoms of inflammatory oral conditions and reduces the healing time.
- Alcohol-free formulation, developed without conventional preservatives, intended for adolescents.

ADVANCED TECHNOLOGY

- **High-Molecular-Weight Hyaluronic Acid**
Deep hydration and physiological regeneration support.
- **Polycarbophil + Cellulose Gum**
High viscosity matrix for controlled application and strong adherence to the oral tissues.
- **Glyceryl Laurate + Disodium EDTA²**
Integrated stability system based on a dedicated gel matrix and controlled pH³.

MECHANISM OF ACTION

- Forms a soft film that adheres to oral tissues
- Mechanically isolates the lesion
- Relieves symptoms of gum inflammation and oral injuries
- Promotes healing.

PLUS

- High viscosity
- Alcohol- and sugar-free, does not contain conventional preservatives, gluten, lactose, parabens or colorants
- High safety profile
- Pleasant Bubble Gum flavour
- Medical Device class II a

INDICATIONS

- Inflammatory conditions involving the gums
- Oral injuries
- Mouth ulcers

CONTENTS

- Tube 15 ml
